Smart Grid RnD Center

Task List:

13-8-26

1. Installation of TVs
2. Purchase and installation of CCTVs
3. Posters with Single line Diagram of Smart Grid setup
4. Name Plate for Lab, mentioning "funded by" LS Electricals, setup designed by VI Micro.
5. Remove unused Racks / shelves
6. Remove all trash across the Lab.
7. Re-organize the existing tables, chairs, Computers etc.

8. All not working monitors, printers, CPUs etc... to be either taken for repair or shifted to EE402 office for storage.

9. for Demo to SG set up, make seating arrangement for 15 to 20 members. Use existing sofas, chairs etc...

10. Make a small poster / sheet listing all the PhD students / M-Tech students / Project staff associated with SG lab.
(This list of currently active students)

11. Make a small poster / sheet listing all previous PhD / Mtech students who completed their studies in IITM.

12. Order one guest or visitors Book, which will record the feedback / comments from the visitors. Such books are available online.

13. Develop a website for the lab, ~~and~~ include various details about the lab, "

- home / contact / about us
- Lab facilities
- Team members
- Funding agency
- Advisors for lab
- events conducted (Past / Future)
- Lab Testing / Certification
- Technologies available

→ CEMS
→ UPS
→ EV
→ SG + Microgrid
→ etc...

14. The Lab Demo should be well structured. Prepare and practice using Script of dialogs.

- Demos of different durations
- 30 min Demo/class
- 15 min Demo
- 5 min Demo.

15. Clean and de-clutter the entire lab. Remove cob-webs, unused cables, boxes etc..

16. Identify well defined "demo Zones" → each dedicated for specific topic/research work.

17. Check all power supplies and network connectivity

18. (Refer to point 14) - Practice the Start-up process of each demo - the demo should be live before the visitors enter.

Visitor Experience

- although the name is "SG RnD center" we will showcase multiple works
- The visit should be memorable
- Create a selfie point - where visitors can take selfies with IITH logo, Lab Name, LS logo etc in the background. Specify them tags to use while posting these photos in their social medias.
- Focus less on showing equipment and more on creating a storyline of research problem and solutions.
